[LinkedIn](#), [Portfolio](#)

Software Engineer with production experience building AI-integrated full-stack web applications with React, Next.js at the senior / lead level. Specialises in component-driven, accessible interfaces for remote-first SaaS environments, with hands-on experience integrating large language models, voice AI, and NLP pipelines (HuggingFace, Gemini, VAPI) into customer-facing products. Maintainer of Turjuman, an open-source Arabic AI document-translation platform. Comfortable moving between frontend (React, Next.js, TypeScript) and backend-adjacent work (Python, FastAPI, Prisma) to deliver end-to-end features in fast-paced product teams.

Core Competencies

- **Frontend Engineering (React/Next.js):** React 18/19, Next.js 15/16, TypeScript, Redux Toolkit, Zustand, TanStack Query – building component-driven, accessible, multilingual interfaces for SaaS dashboards.
- **AI Integration & Applied ML:** Google Gemini API, HuggingFace Transformers, VAPI Voice AI, Label Studio – embedding LLM-driven features, voice agents, and NLP pipelines into production web apps.
- **SaaS & CRM Domain:** Built multilingual admin/staff CRM dashboards (NedSwiss), real-time dashboards, and 3D visualization tools – all under tight product/UX constraints for cross-regional operations.
- **Backend-Adjacent (Python/Node):** Python, FastAPI, Prisma ORM, PostgreSQL, Docker – supporting full-stack feature delivery and data-pipeline work.
- **Arabic Language & Localization:** Native Arabic; experience with Arabic NLP keyword extraction, RTL interfaces, and Arabic-first AI products (Turjuman).
- **Remote Collaboration & Quality:** Git, feature-driven architecture, code review, Agile/Scrum – daily collaboration with multicultural, cross-functional teams in European and MENA corporate environments.

Professional Experience

- **RICOH Europe** **Maadi, Cairo**
Nov 2025–Present
Front-End Developer
 - Build and maintain web application features for cross-regional European operations, including an Arabic NLP keyword-extraction interface integrated with RICOH's enterprise document pipeline.
 - Delivered multiple production frontend projects under the CORELIA umbrella: real-time tailgating anomaly detection with live MJPEG streaming, multi-mode 3D building viewer, invoice lifecycle management, and the Arabic NLP tooling above.
 - Ship modular, reusable component systems with Shadcn UI, Radix UI, and Tailwind CSS, establishing patterns adopted across the CORELIA project portfolio.
 - Collaborate daily with multicultural, cross-functional teams in a remote-friendly European corporate environment; communicate technical decisions clearly across disciplines.
- **NedSwiss** **Remote, Switzerland**
Feb 2025–Nov 2025
Front-End Developer
 - Built a multilingual admin/staff CRM dashboard with rich data tables, chart analytics, and role-based navigation – a near-direct analog to contact-center operations interfaces.
 - Developed a high-performance marketing website with advanced scroll animations (GSAP, Lenis) and micro-interactions, achieving smooth 60fps across devices.
 - Implemented internationalization (next-intl), Zod-validated contact forms, and optimized bundle performance with Turbopack.

- **GDSC – Shorouk Academy** **Shorouk City**
Frontend Leader *Aug 2023–Jun 2025*
 - Led the frontend track for Google Developer Student Club, running workshops and hands-on sessions for 50+ students.
 - Mentored developers in React, Next.js, TypeScript, and modern UI architecture patterns, reinforcing component-driven thinking and code review practices.

Publications & Open Source

- Maintainer – Turjuman: open-source AI-powered Arabic document translation platform.

Education

- **Shorouk Academy** **Shorouk City**
Bachelor of Science in Computer Science *2022–2026*
GPA: 3.8 / 4.0

Languages

- Arabic (native), English (fluent).

Awards

- ****Finalist / Winner** – WE Innovative Hackathon (2026) for CyrusLearn Interactive Learning Platform.**
